Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The terminal disclaimer filed October 23, 2003 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lomneth in view of Adomako or Sagi for reasons of record.

Applicant urges that there is no suggestion in the reference to use the fat Sagi in a spread. Sagi is mainly utilized as a cocoa butter substitute. This has considered but is not persuasive. Tempering accelerators are also used in margarine manufacture and page 2, lines 6-7 is relied upon for support of this assertion. It is well known in the art that a key property of cocoa butter and cocoa butter substitutes is its "melts in your mouth" property. Thus one of ordinary skill in the art would have been led to use any fat with melting characteristics like cocoa butter in a margarine formulation because margarine taste also partly depends on the melting point of the fat at body temperature.

Applicant urges that Adomako teaches away from using the pentadesma with cocoa butter. This has been considered but is not persuasive because at

386, the melting point of the fat is shown to be the same as that of cocoa butter. Thus even though the fat may not be compatible with cocoa butter, one of ordinary skill in the art would still have expected it to improve the overall taste of margarine. Cocoa butter is not typically used in margarine.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
